

REMARKS

Claims 1-17 and 40 are canceled, Claims 18, 25, 28-34, 39, and 41 are amended as shown in the Listing of Claims, and Claims 18-39 and 41-57 are pending in the application.

Initially, appreciation is expressed to Examiner Aguirrechea for indicating that Claims 18-57 are allowed and for and for the helpful suggestions for resolving various informalities in the claims and the specification. With the exception of Claim 42, which is believed to be grammatically correct as written, the Examiner's suggestions for amending the claims have been adopted.

The Specification has been amended at the paragraph bridging pages 3 and 4 to correct minor informalities. In addition, this paragraph has been amended to spell out FEP. "HN" and "FN" refer to types or grades of KAPTON[®] polyimide film manufactured by DuPont and are not believed to be acronyms for other words. Should the Examiner have a specific suggestion for revising this paragraph, Applicants would be pleased to consider such a suggestion. In addition, page 4 of the specification at line 8 has been amended to state that "Heat is dissipated from the transformer core 12 to ambient through a heat sink 17 such as a base plate". As a result, the specification now uses reference numeral 17 to consistently refer to a heat sink throughout the specification.

Formal drawings are concurrently submitted, incorporating the approved changes. The amendment to the specification discussed above is believed to overcome the objection to the drawings as including a reference numeral 17 that refers to two different elements.

Based on the foregoing, Applicants respectfully request withdrawal of the objections to the claims, the specification, and the drawings and an early indication of the allowability of the application.

Should Examiner Aguirrechea believe that a telephone conference or personal interview would help to resolve any questions or to expedite prosecution, the Examiner is cordially invited to contact the undersigned at the number below.

Respectfully submitted,

Sally A. Ferrett
